

GTECHNIQ
SMART SURFACE SCIENCE

**INVISIBLE ARMOUR,
VISIBLE BRILLIANCE**

HALO^{V2}

Unleash the brilliance of HALO^{V2}, Gtechniq's pinnacle of PPF and vinyl protection. With just one layer, your car gains unparalleled defence against dirt and the elements. Simplify your maintenance with our cutting-edge formula for lasting lustre and hydrophobic resilience. HALO^{V2} one layer, pure perfection.

HALO^{v2}

FLEXIBLE FILM COATING

- 18-24 Months Durability On PPF & Vinyl
- Performs On Gloss, Satin and Matt Finishes
- Enhanced Dirt & Water Repellency
- Prevents Staining & Reduces Yellowing Caused By UV Rays

Why Use Gtechniq HALOv2 Flexible Film Coating?

HALOv2 enhances the performance of Paint Protection Film (PPF) and vinyl. It's a chemically bonding, ultra-dense flexible coating that becomes the permanent surface of the film – protecting it from the elements a car faces on a daily basis.

The density of the coating and its low surface energy improve dirt and water repellency of PPF or vinyl. It also helps to prevent staining from dirt ingress, as well as reducing yellowing caused by UV rays.

HALOv2 keeps vinyl and PPF looking in a much better condition and makes it much easier for people to keep their car clean.

Rigorous real-world and laboratory testing has proven **HALOv2** to be compatible with all types of gloss, matt and satin vinyl and PPF. It is also proven to work on self-healing films.
